SUMMARY

Full-Stack Developer, AI Automation Engineer and Reverse Engineer who builds high-performance web apps and automated business systems with Next.js, Django REST, Node.js and n8n. Founded a tech agency and an e-commerce brand, and delivers enterprise PWAs that remove operational bottlenecks.

EXPERIENCE

Founder & Lead Automation Engineer | Webpulse Automation

Dhaka | 2024 - Present

- Design n8n workflows and Messenger order-capture bots that cut manual work by **70%+**.
- Build real-time API integrations between client databases and third-party services.

Full-Stack Developer | Freelance

Remote | 2023 - Present

- Deliver Django REST + Next.js web apps, secure JWT auth and mobile-first PWAs.
- Improve engagement through speed optimization, SEO and smooth animation.

Founder | Ponyopuri

Dhaka | 2023 - Present

- Run an online fashion and retail brand with automated orders and invoicing.

PROJECTS

AMMS - Madrasah Management System

Django REST, Next.js, PostgreSQL, WhatsApp microservice
Enterprise PWA for enrollment, fees and results, with instant WhatsApp alerts to guardians. almadinamadrasa.pages.dev

Webpulse AutoOrder Engine

Node.js, Meta Webhooks, Gemini AI, PDFKit, n8n
Turns Messenger orders into PDF invoices with QR codes and sales records, fully automatically.

MeZuMir E-Commerce

React, Next.js, Tailwind CSS
Grocery platform with category filtering, cart and optimized checkout. mezumir.pages.dev

BD Mess Management

Next.js, React, Tailwind CSS
Tracks daily meals, accounts and bazaar costs for hostels and messes. bd-mess.pages.dev

And many more projects - these are just a few highlights. See the full collection at labibfohayer.github.io and github.com/labibfohayer.
